

OBJECTIVE: To learn how to analyse political divisions and population changes; to describe land use from photographs using maps and photographs of Jamaica.

1. Look at the satellite image and the two maps on pages 28 and 29 to answer the following questions.
 - a. The northernmost area of bauxite workings is in which parish? _____
 - b. In which county is Negril located? _____
 - c. Which county is likely to receive the most rainfall? _____
 - d. The Cockpit Country is shown by what colour in the satellite image? _____
 - e. What physical feature prevents Kingston from expanding north? _____
 - f. Montego Bay is located in which parish? _____
2. Look at the maps and charts on page 31 to answer the following questions.
 - a. Which parishes have the highest population density? _____
 - b. Which parishes had the smallest population change? _____
 - c. In 2011, did most of the population live in urban or rural areas? _____
 - d. Complete the statements below using either **increased** or **decreased**:
 - i. The percentage of the population ages 0-4 _____.
 - ii. The percentage of males, ages 85-89 _____.
 - iii. The percentage of people under age 19 _____.
 - iv. The percentage of females ages 20-24 _____.
 - v. The number of males ages 5-9 _____ by 2%.
3. Use the photo of Ocho Rios on page 30 of your atlas to describe the town.
Include descriptions of what you can see in the background, middle and foreground.
Compare this to the photo of The Cockpit Country in the photo on the same page, and explain why you think the land uses are different.
