

RHINO REMAINDERS

Inside each rhino you will find three numbers. Make any two digit number from the three numbers and then divide by the third number. Your aim is to arrange the numbers so that you come out with the biggest possible remainder. The rhino with the biggest remainder gets to eat the tasty fruit! Which one is it?

The image features three rhinos arranged vertically on a red background decorated with various fruits. Each rhino has a horizontal box across its back containing three numbers. Surrounding each rhino are illustrations of different fruits.
