

About the Series Editor

Ed Walsh

Ed Walsh is a curriculum developer, CPD provider and school improvement officer. A teacher for twenty years and a team leader for twelve of those, he now writes and edits curriculum materials, designs and delivers CPD and works with science departments to improve the quality of their provision. He regularly presents sessions at ASE regional and national conferences and is a Regional Development Leader for the Science Learning Network in the south west. Ed's current projects include developing the Science Mark programme for the National Science Learning Centre, piloting the use of iPads in science teaching and writing STEM teaching materials for Siemens. He lives in Cornwall, where he works with local schools as Science Adviser.

John Beeby

After completing a PhD in insect biochemistry, John Beeby was a teacher of Biology and Chemistry. He has extensive examining experience. John has a passion for making science interesting and relevant and the latest scientific research and developments accessible to learners.

Ann Daniels

Ann is a former headteacher, curriculum developer, teacher trainer and teacher in the UK. She now works as an Educational Consultant, international adviser and assessment specialist.

Sandra Mitchell

Sandra Mitchell spent over twenty years working in schools, as a Head of Physics and a Head of Science. She has extensive examining experience and is a writer, having contributed to several successful textbooks.

Anne Pilling

Anne began her career undertaking research into slow release nutrient tablets and copper based fungicides before becoming a secondary school Science teacher based in the North West. She went on to work as a Consultant Adviser for a local authority, initially as part of the National Strategies initiative, with responsibility for primary and secondary science before taking up her current role as an independent consultant. Anne also has extensive examining experience.
