

## **Snap Science School Review Crosshall Junior School**

To support planning and delivering the new science curriculum, we purchased Snap Science. Each lesson starts with an opportunity to explore, before going into fun activities for the children to complete. There are three levels of differentiation planned for in each lesson and resources to support these, as well as video links. Resources are available in Word format so these can be amended to support children in relevant ways. The teachers in my school are enjoying using the Snap Science planning and delivering the lessons. The resources are well matched to the New Curriculum and each unit ensures progression. The modules within Snap Science also cover a range of enquiry types which is an essential aspect of the New Curriculum. There are assessment opportunities built in which enables teachers to track the progress of the children.
