

I teach years 4, 5 and 6 science and use Snap Science as my main resource. I particularly like the years 4 and 6. The website is easy to use and the animations, videos and slideshows are excellent. The extended learning lessons are creative and fun to teach.

My colleagues are happy with the other years and the books look as if the children have had fun with learning. We will be using the Snap Science target sheets from next year for all year groups, they look straightforward and easy to use. We have been sent an overview which we will use as our medium term plans.

Overall we are very happy with Snap Science!
