ESSENTIAL SPANISH in 2 HOURS with Paul Noble
Welcome to your *Essential Spanish in 2 hours* course supporting guide!

This guide is your companion to, and extension of, the recorded part of your *Essential Spanish* course. And it is probably best if we begin by explaining how these two parts work together to make up *Essential Spanish*.

Your *Essential Spanish* course has been designed so that once you have worked through it, you should be able to take a trip to Spain and chat with the locals when you are confronted by various situations that we all encounter when travelling.

Many of us, at some point in our lives, have picked up a phrasebook in order to *try* to do this exact thing. We might have used one to order a meal, to book a taxi or to buy some tickets. One drawback of using such a phrasebook, however, is that you always need to carry it around with you wherever you go. You then also have to take it out each time you want to use it, find the right page and then try to pronounce what it says correctly. Not only this, but if the phrase you find isn’t *exactly* what you’re looking for, what are you going to do then? If you can’t alter it, then it probably won’t be of much use to you.

These drawbacks, which affect phrasebooks, will not apply to this course. Instead, *Essential Spanish* will teach you how to construct the language *by yourself, independently*. You’ll learn how to put sentences together yourself and the language will be introduced to you in such a way that you’ll be able to remember it without even trying.

So, once you’ve finished listening to the course, and then later reading through this guide, you will no longer need to carry a phrasebook around at all. Instead, it will be in your head! And you’ll be able to adapt the phrases and sentences you have learnt so that you will have far more flexibility, in terms of what you can say, than you would ever have had with a normal phrasebook. And, more than that, you will actually understand what it is you’re saying!
How to use this guide

This guide has been designed to provide you with a quick and easy way to review, reinforce and extend the key vocabulary, structures and content that you’ll learn through listening to the recorded part of your Essential Spanish course.

The first part of your learning will involve listening to the accompanying audio. Then, once you have listened to the audio tracks, this guide will make it possible for you to extend your knowledge of Spanish further, by allowing you to acquire additional words and components.

It is worth noting, however, that this guide should be used after you have begun working through the accompanying audio tracks. It will serve as excellent review and extension material but it is not designed to start you off in the language. This is what the audio will do – and very rapidly too.

Easy reference script

The best way to use this part of the guide is to start by reading through a section of the easy reference script, looking at both English and Spanish. Then go back to the beginning of that section and, while covering the Spanish side of the text, translate the English into Spanish – just as you did when you listened to the audio.

Once you can get 90% of a section’s content correct, move on to the next part and follow the process again. Doing this, you will quickly recall and review what you learnt with the audio.

(Note: Track numbers have been included in the script. This will allow you to know exactly where you can locate anything you might wish to review from the easy reference script.)
**Track 3**

I have visited Madrid.

He visitado Madrid.

I have visited Barcelona.

Ha visitado Barcelona.

Have you visited Madrid?

¿Ha visitado Madrid?

Have you visited Barcelona?

¿Ha visitado Barcelona?

Yes.

</tr>
</tbody>
</table>
Building on what you’ve learned

In a similar way to how you have used the easy reference script, the best way to use this part of your guide is to start by reading through a section, looking at both the English and Spanish. This time, however, make sure you also pay attention to the pronunciation guidance provided next to new words.

Once you have read through a section in this way, go back to the beginning of the same section and, while covering the Spanish side of the text, try to translate the English into Spanish. If you have forgotten some of the words, don’t worry – this is not about memorising! Instead, simply work your way through the rest of the section and then start the same section over again.

Once you can get 90% of a section’s content correct, move on to the next section and follow the process until you have completed each and every section.

Finally, once you have done all of this, take a break for a day and then repeat the entire process a second time. Doing this, you will find that you very quickly and thoroughly absorb the new vocabulary and components that have been introduced without ever trying to memorise them. You will instead simply “pick them up” by working through them. Now, get going with it!
