Integrated Science for the Caribbean is an activity-led course set in contexts relevant to the Caribbean.

Suitable for lower secondary students, it develops the skills needed for success in science alongside developing scientific knowledge. This recently published 2nd edition has been written specifically for the Caribbean and has been written by science education experts and teachers in the region.

The scheme is made up of three Student’s Books and three Workbooks across Forms 1-3.

**Student Books**
- Introductory overview gives a clear explanation about each topic
- Learning objective clarifies the focus and expected outcome of each unit
- Step-by-step instructions are provided for each activity
- Includes projects and ideas for STEM

**Integrated Science Workbooks:**
- Provide opportunities for written activities
- Enable students to record their personal progress throughout the course
- Help students to consolidate the learning from activities carried out in class
- Offer useful resources for homework activities

**Integrated Science for the Caribbean** is an activity-led course set in contexts relevant to the Caribbean.

Suitable for lower secondary students, it develops the skills needed for success in science alongside developing scientific knowledge. This recently published 2nd edition has been written specifically for the Caribbean and has been written by science education experts and teachers in the region.
