

Tips for helping your child with their homework

- Create a work space, away from any distractions.
- Make sure your child has everything they need (paper, handwriting pen, pencil, sharpener, dictionary, etc.)
- Try to keep background noise to a minimum.
- Make a homework timetable with sufficient breaks.
- Ask your child's teacher whether you should help correct any mistakes or hand in as it is.
- Encourage your child to read and check their homework once they have finished. They may spot some simple mistakes by themselves.
- Discuss ways they may be able to find an answer, rather than just giving them the answer.
