Only 19% of total births in South Sudan are attended by skilled health staff

Adolescent fertility rate in Niger 199 per 1000 women

A fertility rate of two children per woman is considered the replacement rate with levels lower than this indicating a declining population – assuming this is not outweighed by migration.

Adolescent fertility rate (births per 1,000 women ages 15-19)

Crude birth rate (per 1000 people)

Births attended by skilled health staff

Contraceptive prevalence (% of women ages 15-49)

Fertility rate (births per woman)

Female population (millions)

Health expenditure per capita (current US$)
