Money Monster

Understand money and

Zoo Enclosures

Practice calculating

Make

- ➔ Print the children's photographs and lay them out for sorting.
- ➔ Use labels or large pictures to represent the shapes your class have looked for. Ask children to match their photographs to the label. They should stick these on with glue.
- ➔ Mount these onto a backed display board.
- ➔ Make the display interactive by sticking on additional photos with hook and loop fasteners, with a written invitation to place them correctly (it may be best to laminate these as they will wear out as the children reposition them).
- ➔ Leave extra hook and loop fasteners attached to the board for repositioning.
