

## Pages 76–77 Statistics

1 a  $\text{|||||}$   $\text{|||}$  and  $\text{|||||}$   $\text{|}$     b 2 and 1    c 28 days

2 a Frequencies are 2, 4, 5, 4, 7, 3, 3, 2 (1 mark for 5 or more frequencies correct)

3 3

4 a 6    b 12

5 a 12    b 5

6 a 1    b 4

7 a 31    b 19 °C    c 4 °C    d July, hot

## Pages 78–79 Mode, median and mean

1 7

2 30

3 a 38    b 38    c 37.4

4 a 24    b 23    c 22

5 a 3    b 4    c 3.9

6 a 30    b 2    c 57    d 1.9

7 a False    b False    c True

8 a 10X: 0, 10Y: 4    b 10X: 2, 10Y: 2.5    c 10X: 2.2, 10Y: 2.5    d 10Y: bigger averages.

**Pages 80–81 Comparing distributions**

- 1** B
- 2** 6, 6, 9
- 3** 4, 5, 9
- 4** 2, 8, 8 and 8, 8, 14
- 5** B more consistent and mode is 0
- 6** a, b and d
- 7** a, b and c
- 8** **a** both 2.5 **b** Aisha 7, Sarah 3 **c** Aisha as she sometimes scores lots of goals in one match or Sarah as she is more consistent
- 9** **a** **i** 7 **ii** 7 **b** **i** 10 **ii** 4 **c** Outside is more consistent or greenhouse has more tomatoes on some plants

**Pages 82–83 Line graphs**

- 1** **a** 14 °C **b** Thursday and Saturday **c** Friday 17 °C **d** Line has no meaning. Temperature changes throughout the day. Values are just the value at 12 midday.
- 2** **a** Midnight 4 °C, Midday 6 °C **b** 6 °C **c** Friday 13 °C
- 3** **a** 1900 miles **b** 5500 miles **c** June
- 4** **a** About 9500 **b** No, still above 5000 and may not drop below **c** Yes, change is continuous, so about 15 000
- 5** No, can't assume it keeps raining but if depth continues to rise at same rate as between 10 am and 11 am area will flood by 2 pm.

## Pages 84-85 Pie charts

1 3 : 1

2  $160^\circ$ ,  $60^\circ$ ,  $140^\circ$ ,  $360^\circ$  (1 mark for first three)

3 a Angles: Blue  $162^\circ$ , White  $72^\circ$ , Silver  $126^\circ$  (1 mark for any two)

b

(1 mark if any sector wrong or if not labelled)

4 15

5 160

6 40

7 c

8 a

9 Angles: British  $162^\circ$ , American  $90^\circ$ , French  $72^\circ$ , German  $36^\circ$

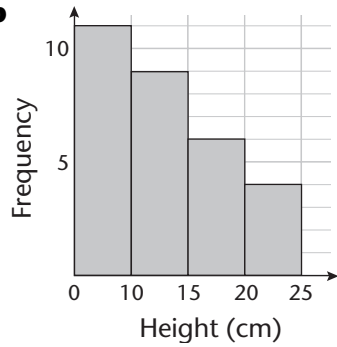

10 Angles: Blue  $216^\circ$ , Silver  $108^\circ$ , Black  $36^\circ$

## Pages 86–87 Frequency diagrams

1 a 11, 9, 6, 4 b

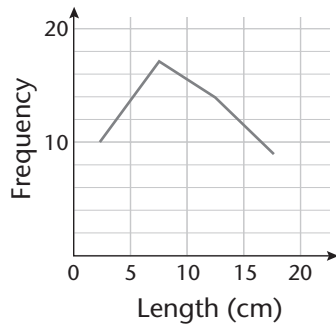

2 a 27 b 14 c 0, 1 or 2

3 a, b and d

4 0 | 7 8 8 8 9  
 1 | 1 2 3 3 5 7 8 9  
 2 | 1 2

5 a 16 b 7 c 56 d 102

6

7 a 34 b 22 c 21 years

## Pages 88–89 Scatter diagrams

1 a i W ii N iii K iv G b i N ii G iii S iv K

b 150 cm c No, doesn't fit line of best fit.

3  $2\frac{1}{2}$  hours

4 a, c and d

5 a, b and d

6 a Weak positive b

c  $3\frac{1}{2}$ –4 hours

## Pages 90–91 Surveys

1 b and c

2 a i Not enough responses ii Not enough responses iii Not relevant to question

b Good range of responses that covers all views

3 1 Leading question, 2 offensive question

4 Derek. Others are biased, Derek gets a random sample.

5 Not enough responses

6 Quota sampling, will give a varied sample

7 All the men and only a fraction of women is not representative.

8 a i Not enough responses ii Not enough responses iii Not relevant to question

b Good range of responses which can be analysed mathematically

9 Owen. All methods give a random sample but the more pupils surveyed the better.

## Pages 92-93 Probability 1

1  $\frac{1}{2}$

2  $\frac{1}{2}$

4 a  $\frac{3}{5}$     b  $\frac{2}{5}$

5 a  $\frac{7}{10}$     b  $\frac{3}{10}$

6  $\frac{3}{7}$

7 3

8  $\frac{11}{20}$

10 a  $\frac{2}{5}$     b  $\frac{2}{3}$

## Pages 94-95 Probability 2

1 a  $\frac{2}{5}$     b  $\frac{2}{3}$

2  $\frac{11}{25}$

3 Red 8, Blue 2

4 a  $\frac{1}{4}$     b  $\frac{1}{2}$

5 a HHH, HHT, HTH, HTT, THH, THT, TTH, TTT    b  $\frac{1}{8}$

6 a  $\frac{1}{6}$     b  $\frac{1}{12}$     c  $\frac{1}{6}$

7 a  $\frac{9}{25}$     b  $\frac{13}{25}$

8 a                      First score                      b i  $\frac{1}{2}$     ii  $\frac{3}{16}$     iii  $\frac{3}{8}$

		1	2	3	4
Second score	1	2	3	4	5
	2	3	4	5	6
	3	4	5	6	7
	4	5	6	7	8
